

Extended Consecutive Absences

Students returning from an extended absence of three or more days must submit a note from their physician to the Health Office **within three school days** after the student's return to school. The physician's note should list the corresponding dates of absences.

If a physician's note is received within three school days after the student's return, the third and consecutive absences will be excluded from counting toward the maximum absence limits. The first and second dates will count toward the maximum absence limits.

If a physician's note is not received within three school days after the student's return, the absences will count toward the maximum absence limits.
